

1 Creación de enlace de rexistro e acceso a AWS Educate para estudantes en Moodle

Dende o **4 de Xaneiro de 2021** o acceso do alumnado ás contas de AWS Educate só será factible dende os seguintes métodos:

- **1.- Canles iniciados polos/as educadores/as:** inclúense Classrooms de AWS Educate e enlaces de invitación dende Sistemas de Aprendizaxe como Moodle.
- **2.- Enlaces promocionais de colaboradores:** Pearson, Github, edX, etc..

Captura da mensaxe informando do cambio en AWS Educate:

Important Changes to AWS Educate Starter Accounts for Students

We are writing to make you aware of an important upcoming change to AWS Educate. AWS Educate provides access to the AWS Console for students. Starting January 4, 2021, AWS Educate Starter Accounts will only be granted to students who join AWS Educate through two methods:

- **Educator-initiated channels**, including AWS Educate Classrooms and Learning Management System invite link
- **Promotional links from AWS Educate approved collaborators**, including but not limited to: Pearson, Edhesive, Project Lead the Way, FIRST, GitHub, and edX

This change will impact all students who join AWS Educate after **January 4, 2021**. There will be no changes to the educator portal or methods of requesting AWS Promotional Credits for students.

Additional information on these channels and ways to support your students in their learning can be found in the below FAQs.

Thank you,

The AWS Educate Team

Imos ver **cómo crear un enlace de invitación ó programa AWS Educate e así incluílo no noso curso de Moodle.**

Dito enlace proporcionará:

- Acceso a AWS Educate.
- Posibilidade de logueo automático en AWS Educate simplemente iniciando sesión no Moodle do centro(Mestre).
- **ATENCIÓN:**
- O alumnado que se loguea ou rexistra dende os enlaces creados no Moodle deberá cubrir adicionalmente o seu perfil **prestando especial atención á data de cando remata o seu curso.**
- Esa **data do finalización dos seus estudos no rexistro en AWS Educate en Amazon** será a data de caducidade dos servizos en AWS Educate.
- **Exemplo1:** se o alumnado se rexistra en AWS Educate en **primeiro curso** (exemplo Setembro 2020) debería por como data da súa graduación Setembro ou Decembro de 2022.
- **Exemplo2:** se o alumnado se rexistra en AWS Educate en **segundo curso** (exemplo Setembro 2020) debería por como data da súa graduación Setembro ou Decembro de 2021.

Pasos para a **creación do enlace de rexistro en Moodle:**

- As datas Inicio do curso e finalización (**Course Start Date** e **Course End Date**) fan referencia ás datas nas que o enlace de invitación que estamos creando será válido e estará activo.
- Poderemos crear o enlace de invitación dende: **Aulas y Créditos** e pulsando en **AWS Educate and Your LMS.**
- Ou pulsando directamente neste enlace: <https://www.awseducate.com/educator/s/lms-connect>
- Dende **Aulas y Créditos** poderemos facer tamén a outra opción de rexistro para alumnado que é crear unha Classroom: **Request or go to an AWS Educate Classroom**

Classrooms, Promotional Credits & Tools

Get your class up and running quickly on AWS with tools to help you set up cloud assignments and classroom infrastructure. Check out the AWS Educate LMS integration option, class promotional credit request, classroom, and tutorials to get your students started on AWS in 10 minutes.

Request or go to an AWS Educate Classroom

Request or access your AWS Educate Classrooms. Follow a simple 3-step process to get started and provide your students with free and easy access to the AWS Console for homework, labs, and projects.

Request

AWS Educate provides a simple process for institutions to request a classroom and granting free usage to students for homework, labs, and projects.

AWS Educate and Your LMS

Streamline the process students use to access AWS resources for your course through a simple integration with your LMS.

Seleccio

para cre

AWS Educate and your Learning Management System

Your students will be able to access AWS Educate through your LMS once two things happen. First, request credentials for your organization's LMS, and use those credentials to complete the setup. Then, request to connect a new course to receive credentials to use when they register. We support Canvas, Blackboard, EdX, Desire 2 Learn and Moodle. [Learn More](#)

Request Credentials to Connect My Organization

Set up a new organization-wide configuration in your LMS. New courses can use the same configuration without repeating the set-up. (Provides key and secret only; request a Launch URL separately. Usually requires Administrator-level access in the LMS.)

Request

Connect your course to AWS Educate. If your LMS already has credentials set up, you can use them. Otherwise, your students can click from the LMS to AWS Educate.

My Requests

Seleccionamos esta opción para conectar el curso

Click on approved requests to access credentials, course links, and instructions to complete setup.

S

- O IES San Clemente xa está conectado a AWS Educate, polo que simplemente teremos que **engadir un novo curso**, tal e como se amosa na seguinte imaxe da **Solicitud para Conectar un novo curso a AWS Educate**:

Request to Connect New Course

Connect your course to AWS Educate, whether or not your organization already has credentials set up. You will receive a confirmation email and a link to click from within your course.

Request Type

- ☒ My organization is already connected to AWS Educate. I just need to add a new course.
- ☐ My organization is not yet connected to AWS Educate. I need to set up a new connection for my course.
